Introduction

The SB/ESB Series thermal protector offers the reliability of a bimetal protector in a robust hermetic package. It is ideally suited to provide thermal and/or locked rotor protection in applications requiring unique processing or environmental challenges (AC/DC motors, compressors, transformers, etc.).

With an exceptional history of more than 90 years, Sensata Technologies is a leading supplier of sensors and switches.

Features

- Hermetically sealed
- Compact
- Opening temperature range of 60ºC to 170ºC in 5ºC increments
- Snap action
- Copper or tin plated copper leads in a variety of lengths

Benefits

- Safe from penetration of fluids
- Ultimate corrosion protection
- No secondary insulation needed
- Can operate in high pressure environments
- Improves safety of end product

Sensata Technologies’ miniature, glass encapsulated thermal protectors provide both thermal and current overload protection.

The SB/ESB family of protectors combines Sensata’s bimetal protection technology with a true glass to metal hermetic seal. This ultra-reliable combination can be used for such things as small AC fractional horsepower motors, DC motors, battery chargers, ballasts, NiCad battery packs, transformers and internal protection for compressors.

Sensata Technologies is an ISO and TS registered company providing world class quality products.
These curves are to be used only as a guide in selecting a protector for a particular application. Factors such as distance from the heat source and the method of mounting should be considered in selecting a protector. Final trip times are dependent upon terminal configuration and mounting in the application.

DIMENSIONS
All dimensions are in millimeters (Inches).

- Bimetal Snap Blade
- Silver Contacts
- Glass case
- Bead
- Hermetic Seal
- Copper Leads
  - .76 (.030)

Dimensions:
- 7.11 (.280)
- 7.62 (.300)
- 7.92 Max (.312)
- 31.75 Max (1.25)
- 28.56 (1.125)
- 34.93 (1.375)
- 1.27 (.050)
- 2.54 (.100)

WARNINGS

RISK OF MATERIAL DAMAGE AND HOT ENCLOSURE
- The product’s side panels may be hot, allow the product to cool before touching
- Follow proper mounting instructions including torque values
- Do not allow liquids or foreign objects to enter this product

Failure to follow these instructions can result in serious injury, or equipment damage.

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH
- Disconnect all power before installing or working with this equipment
- Verify all connections and replace all covers before turning on power

Failure to follow these instructions will result in death or serious injury
