1.0 PURPOSE

This document defines the requirements for maintaining records that provide both evidence of conformity to requirements, maintain compliance to AS9100 and Kavlico Quality Management System AQMSM1001 and the effective operation of Kavlico's Quality Management System (QMS).

2.0 SCOPE

This document applies to both physical and electronic records, which demonstrate conformance to the specified requirements and the effectiveness of the QMS. This includes records pertaining to suppliers.

3.0 REFERENCE DOCUMENTS

AS9100	Quality Management Systems, Aerospace
AQMSM1001	Quality Management System Manual
AP0402	Quality System documentation
AP0405	Document Control
AP0406	Supply Chain Management

All Operational Procedures and Work Instructions that require establishment of records.

4.0 DEPARTMENTS RESPONSIBLE FOR IMPLEMENTATION

Quality Assurance: It is the responsibility of Quality Assurance to ensure that an adequate and effective system exists throughout the organization for establishing and maintaining records that adequately document the operation of the QMS.

Management and Supervisors: It is the responsibility of management and supervisors to maintain records in accordance with established policy as described herein. Management and supervisors are responsible to periodically review this document and notify Quality of any changes to record keeping requirements defined within Appendix A.

Document Control: It is the responsibility of Document Control to maintain a system to archive and control applicable records in accordance with the document control procedure referenced herein.

5.0 PROCEDURE

- 5.1 Records identified herein are identified and maintained as a minimum in accordance with mandated sections of the AS9100 standard.
- 5.2 Records must be stored in a secure manner that minimizes deterioration or damage, eliminates loss and is readily accessible for review and analysis.

- 5.3 Each department shall maintain data and records that fall within the scope of this procedure. Records are as defined in **Appendix A**.
- 5.4 All records shall be complete, reliable, consistent and maintained in an orderly manner. Unless specifically directed otherwise by the documentation requiring the completion of a form or log, all blocks, lines, spaces identifying information to be entered require completion. No blank or empty sections are allowed.
- 5.4.1 The only acceptable entries on forms filled manually are:
- Specific data/information as specifically required
 - N/A (indicating not applicable)
 - N/R (indicating not required)
- Note: If specific restrictions exist relative to acceptable entries, they shall be clearly defined in the documentation requiring form completion.
- 5.4.2 Unless specified on manual logs (i.e. instructions for completion) all lines require individual entries. The use of "ditto" marks, lines drawn through specific entry fields, etc. are not recognized as acceptable logging of information. Unless otherwise prohibited, entries identified on Section 5.4.1 are acceptable.
- 5.4.3 When a record is completed on an electronic or on-line form, the specific application will control and identify the required entries for its completion, including specific formatting of such entry. If the entry format is not specified, manual entry shown on Section 5.4.1 is applicable.
- 5.5 Records must be legible and traceable to specific product or process. Except for redlines, handwritten entries must be in black or blue indelible ink. If any record needs to be modified, the authorized personnel must strikethrough with a single line and enter the correction followed by date and initials. No "white-out" is allowed.
- 5.6 Records are retained in their original medium or electronic/digital medium unless otherwise required in contractual, statutory or regulatory requirements. All FAA (Federal Aviation Administration) documents shall be retained in the originally issued medium. Records should be easily retrievable and be available for review by the customer, customer's representative and/or regulatory agency at a designated location within Sensata as required. Documents converted from hard copy to electronic/digital media shall be verified for content and filed appropriately. For converted documentation, the hard copy can be appropriately disposed of after the verification of the electronic/digital media is completed.
- 5.7 Kavlico performs electronic quality record data back-up using the services of an outside third-party provider. The external third-party provides coverage in the event of a disaster and manages the on-site retention and retrieval of data (up to a month of data), as well as offsite for extended retention (up to 1 year for monthly back-ups and 10 years for yearly back-ups). The third-party provider is responsible of the integrity of the hardware, as well as the maintenance and upgrades on the data servers.

- 5.8 Records such as certifications of conformance, verification/test data, etc. that are created by suppliers are controlled and maintained as defined in **Appendix A**. Records controlled and maintained at suppliers are as defined in AP0406.
- 5.9 Records for monitoring process performance and for conformity shall indicate acceptability of the product or process and the action taken in connection with any deficiencies.
- 5.10 Records identification, general maintenance and control are verified during the internal audit of the specific process area.
- 5.11 In the case that Kavlico discontinues the acceptance of customer purchase orders, Kavlico shall be responsible for the archival of all quality records for the time retention period specified in this procedure. In case of termination / cease of operations, quality records will be retained at another Sensata facility. Kavlico shall inform to the customer of the planned transfer prior to the transfer of said records to another location. Sensata Technologies Inc. Legal Group may approve the transfer of all quality records to the customer.
