Swindon, United Kingdom – October 30, 2018 - Sensata Technologies (NYSE: ST), a global industrial technology company and a leading provider of sensors, today announced financial results for its third quarter ended September 30, 2018.

Revenue in the third quarter of 2018 was \$873.6 million, an increase of \$54.5 million, or 6.7%, from revenue of \$819.1 million in the third quarter of 2017. Excluding a 1.2% negative effect from exited businesses, Sensata reported organic revenue growth of 7.9% in the third quarter of 2018. Changes in foreign exchange rates had a negligible effect on revenue growth in the third quarter of 2018.

Net income in the third quarter of 2018 grew 69.4%, totaling \$149.1 million, which was 17.1% of revenue or \$0.88 per diluted share, compared to net income of \$88.0 million in the third quarter of 2017, which was 10.7% of revenue or \$0.51 per diluted share. This increase included a \$57.8 million gain, net of transaction costs, related to the Company's divestiture of its non-strategic valves business completed in August 2018.

Changes in foreign currency exchange rates increased Sensata's adjusted EBIT margin by 60 basis points, and increased Sensata's adjusted earnings per share by \$0.03 in the third quarter of 2018 compared to the prior year period.

"We are exceeding the operational goals we laid out at our Investor Day last December. These goals included accelerating our organic revenue growth, increasing our adjusted EBIT margins, and executing a balanced, returns-driven capital deployment program," said Martha Sullivan, President and Chief Executive Officer. "Our strong top-line performance in 2018 is being driven by long-term secular growth as we continue to outgrow our markets. Over the past four months, we have returned approximately \$400 million in cash to shareholders through our share repurchase program. Today, we are announcing a new \$250 million share repurchase authorization, which reflects our continued commitment to a balanced capital deployment strategy and our confidence in the future performance of the Company."

Sensata established a share repurchase authorization at the end of May and repurchased 7.6 million shares for a total consideration of approximately \$400 million since its inception. The Company expects to repurchase up to \$250 million within the next 18 months as part of its new share repurchase authorization.

Non-GAAP Financial Measures

We supplement the reporting of our financial information determined in accordance with U.S. generally accepted accounting principles (“GAAP”) with certain non-GAAP financial measures. We use these non-GAAP financial measures internally to make operating and strategic decisions, including the preparation of our annual operating plan, evaluation of our overall business performance, and as a factor in determining compensation for certain employees. We believe presenting non-GAAP financial measures is useful for period-over-period comparisons of underlying business trends and our ongoing business performance. We also believe presenting these non-GAAP measures provides additional transparency into how management evaluates the business.

Non-GAAP financial measures should be considered as supplemental in nature and are not meant to be considered in isolation or as a substitute for the related financial information prepared in accordance with U.S. GAAP. In addition, our non-GAAP financial measures may not be the same as, or comparable to, similar non-GAAP measures presented by other companies.

The non-GAAP financial measures referenced by Sensata in this release include: adjusted net income, adjusted net income margin, adjusted earnings per share (“EPS”), adjusted earnings before interest and taxes (“EBIT”), adjusted EBIT margin, free cash flow, net debt, organic revenue growth, and segment profit margin measured on a constant currency basis. We also refer to the change of certain non-GAAP measures, usually reported either as a percentage or number of basis points, between two periods and measured on either a reported or an organic basis, the latter of which excludes the impact of acquisitions, net of exited businesses that occurred within the previous 12 months and the effect of foreign currency exchange rate differences between the comparative periods. Such changes are also considered non-GAAP measures.

Adjusted net income is defined as net income, determined in accordance with U.S. GAAP, excluding certain non-GAAP adjustments which are described in the accompanying reconciliation tables. Adjusted net income margin is calculated by dividing adjusted net income by net revenue. Adjusted EPS is calculated by dividing adjusted net income by the number of diluted weighted-average ordinary shares outstanding in the period. We believe that these measures are useful to investors and management in understanding the ongoing operations and in analysis of ongoing operating trends.

Adjusted EBIT is defined as net income, determined in accordance with U.S. GAAP, excluding interest expense, net, provision for/(benefit from) income taxes, and certain non-GAAP adjustments which are described in the accompanying reconciliation tables. Adjusted EBIT margin is calculated by dividing adjusted EBIT by net revenue. We believe that these measures are useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.

Free cash flow is defined as net cash provided by operating activities, determined in accordance with U.S. GAAP, less additions to property, plant and equipment and capitalized software. We believe that this measure is useful to investors and management as a measure of cash generated by business operations that will be used to repay scheduled debt maturities and can be used to fund acquisitions, repurchase ordinary shares, or for the repayment of debt obligations.

Net debt is defined as total debt, capital lease and other financing obligations, determined in accordance with U.S. GAAP, less cash and cash equivalents. We believe that this measure is useful to investors and management as an indicator of trends in our overall financial condition.

Organic revenue growth is defined as the reported percentage change in net revenue, determined in accordance with U.S. GAAP, excluding the impact of acquisitions, net of exited businesses that occurred within the previous 12 months and the effect of foreign currency exchange rate differences between the comparative periods. We believe that this measure is useful to investors and

management in understanding our ongoing operations and in analysis of ongoing operating trends.

Segment profit margin measured on a constant currency basis is defined as segment profit, excluding the favorable or unfavorable impact of foreign currency exchange rate differences with the comparative (prior) period, divided by segment revenue, also adjusted to exclude the favorable or unfavorable impact of foreign currency exchange rate differences with the comparative (prior) period. We believe that this measure is useful to investors and management in understanding our ongoing operations and in analysis of ongoing operating trends.

Sensata's definition of adjusted net income excludes the deferred provision for/(benefit from) income taxes and other tax expense/(benefit). Sensata's deferred provision for/(benefit from) income taxes includes: adjustments for book-to-tax basis differences due primarily to the step-up in fair value of fixed and intangible assets and goodwill, the utilization of net operating losses, and adjustments to our U.S. valuation allowance in connection with certain acquisitions. Other tax expense/(benefit) includes certain adjustments to unrecognized tax positions, and for the three and nine months ended September 30, 2018 includes \$10.0 million of current tax expense related to the repatriation of profits from certain subsidiaries in China to their parent companies in the Netherlands and the U.S. The decision to repatriate these profits was the result of Sensata's desire to reduce the Company's balance sheet exposure, and corresponding P&L volatility, related to the Chinese Renminbi.

As Sensata treats deferred income taxes as an adjustment to compute adjusted net income, the deferred income tax effect associated with the reconciling items, above, would not change adjusted net income for any period presented.

The current income tax (benefit)/expense associated with the reconciling items above, which is included in adjusted net income, would be as follows: Depreciation and amortization expense related to the step-up in fair value of fixed and intangible assets and inventory: (\$0.0) million and (\$0.0) million for the three months ended September 30, 2018 and 2017, respectively and (\$0.0) million and (\$0.0) million for the nine months ended September 30, 2018 and 2017, respectively; and Restructuring related and other of (\$0.3) million and (\$0.1) million for the three months ended September 30, 2018 and 2017, respectively and (\$1.0) million and (\$0.3) million for the nine months ended September 30, 2018 and 2017, respectively.
