

3BT & 4BT SERIES

0°F to 350°F, Tiny Stat™ Precision Thermostats

Introduction

Klixon® Tiny Stats combine an impressive list of superlatives in a reliable, hermetically sealed, snap-acting Klixon® design. They are the smallest envelope size ever developed — ideal for remote sensing applications in locations with severe space limitations. They are the lightest construction available — perfect for applications where weight is an important consideration. They have an extremely fast response in order to permit early warning of overheat conditions. The low mass internal components allow Tiny Stat precision thermostats to meet the most demanding shock and vibration standards of MIL-PRF-24236.

Features

- Smallest snap-acting thermal switches ever made
- Extremely fast response
- Single pole, single throw (SPST)
- Normally open or closed
- Preset, non-adjustable calibration
- Hermetically sealed and back-filled with nitrogen
- Gold plated
- Various mounting configurations available
- Qualified to MIL-PRF-24236/13 (4BT) and MIL-PRF-24236/19 (3BT)
- Qualified to NASA S-311-641/06 (4BT) and NASA S-311-641/07 (3BT)

PERFORMANCE CHARACTERISTICS

Gold plated contacts can be furnished to assure reliable circuit switching under low wattage conditions. (See second table below.) Gold plated contacts are not suitable for higher loads.

Contact Ratings (Resistive) Based on standard differential

115 VAC / 30 VDC	30 mVAC*	30 mVDC*	Life Cycles
1.0 Amp	0.01 Amp	0.01 Amp	10,000

* Specify gold contacts.

Gold Contact Ratings (Resistive)

30 VAC/DC	500 mA and below
115 VAC	200 mA and below

Characteristics

Switch Action	SPST (snap-action)
Contact Resistance	0.050 ohms maximum (0.100 ohms maximum for close on rise devices with setpoints greater than 175°F) per MIL-STD-202, Method 307
Dielectric Strength	500 vac, RMS, 60 Hz for 5 seconds, across open contacts, per MIL-STD-202, Method 301
Vibration Resistance	5–2000 Hz, 30 G, per MIL-STD-202, Method 204 <i>Vibration resistance specification does not apply to devices that open on temperature rise while at temperatures of 75°F or more below the opening temperature or to devices that close on temperature rise while at temperatures of 75°F or more above the closing temperature.</i>
Shock Resistance	100 G, 6 milliseconds per MIL-STD-202, Method 213
Hermeticity	1 x 10 ⁻⁸ atm cc/sec. maximum, per MIL-STD-202, Method 112, Condition C
Salt Spray Resistance	Per MIL-STD-202, Method 101, Condition B, 5% solution
Weight	Basic Unit: 0.2 to 0.9 grams
Ambient Temperature Range	-80°F to 350°F (-62.2°C to 176.7°C)

Operating Temperature

Standard temp settings (dash 1 to 71) are shown in the temperature table below. Sensata can make thermostats to any custom set point temperature within the specified operating temperature range. Contact factory for assistance with custom set point temperatures.

Dash	Operating Temperature		Differential		Tolerance	
#	°F	°C	°F	°C	±°F	±°C
1	0	-17.8	30	16.7	8	4.4
2	5	-15.0	30	16.7	8	4.4
3	10	-12.2	30	16.7	8	4.4
4	15	-9.4	30	16.7	8	4.4

Pin-Type	For quick assembly to printed circuit boards (3BT-2 and 3BT-15)
Threaded Plug	For surface temperature sensing (3BT-3)
Insulated Version	For applications where grounded case construction is not suitable (3BT-6)
Low Profile	For applications where an extremely low profile is critical (4BT-2)
Other	Other styles are available

Our most common configurations are shown below, but other styles are available:

<p>3BT-2</p>  <p>Grounded case construction Approx. wt. 0.4 grams Conforms to MIL-S-24236/19 configuration 1</p>	 <p>.093 .070 .215 .040 Dia Glass to Metal Seal .176 .136 .060 Dia .189 Dia</p>
<p>3BT-3</p>  <p>Grounded case construction Approx. wt. 0.9 grams Conforms to MIL-S-24236/19 configuration 2</p>	 <p>.281 Hex Glass to Metal Seal .110 Ref .203 .170 Weld .050 Dia 1/4 - 28 UNF - 2A THD 6 INCH LBS MAX TORQUE .045</p>
<p>3BT-6</p>  <p>Case insulated Approx. wt. 0.9 grams Conforms to MIL-S-24236/19 configuration 3</p>	 <p>.110 Ref .093 .070 .040 Dia Glass to Metal Seal .215 4 - 40 UNF - 2A THD 4 INCH LBS MAX TORQUE .168 .187 .189 Dia .050 Dia .156 .290 Silver Braze</p>
<p>3BT-8</p>  <p>Grounded case construction Approx. wt. 0.4 grams Conforms to MIL-S-24236/19 configuration 4</p>	 <p>Glass to Metal Seal .093 .070 .215 .040 Dia Weld .168 .156 .110 ref .050 Dia .189 Dia</p>
<p>3BT-15</p>  <p>Printed circuit board mount Approx. wt. 0.4 grams Conforms to MIL-S-24236/19 configuration 5 Actual size</p>	 <p>.060 .215 Dia. .060 Dia. .168 .156 200 190 .189 Dia.</p>
<p>4BT-2</p>  <p>Grounded case construction Approx. wt. 0.2 grams Conforms to MIL-S-24236/13</p>	 <p>.080 .021 .130 Dia .070 .263 Dia .213 Rad 30°</p>

4BT **L** **2** **-** **22** **-** **98**

Family _____

3BT
4BT

Constant Action _____

L = Open on rise, silver contacts
R = Open on rise, gold contacts
F = Close on rise, silver contacts
D = Close on rise, gold contacts

Style _____

Operating Temperature _____

Standard temp settings (dash 1-71) are shown in temperature table above. Non standard settings are available upon request.

Optional Wire Lead _____

Optional wire lead for the 4BT Standard:
98 = 12" stranded 22 gauge white Teflon insulated (omit if leads are not required).

WARNINGS

RISK OF MATERIAL DAMAGE AND HOT ENCLOSURE

- The product's side panels may be hot, allow the product to cool before touching
- Follow proper mounting instructions including torque values
- Do not allow liquids or foreign objects to enter this product

Failure to follow these instructions can result in serious injury, or equipment damage.

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Disconnect all power before installing or working with this equipment
- Verify all connections and replace all covers before turning on power

Failure to follow these instructions will result in death or serious injury.

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet.
