

# BALL END TETHER

M9230-04/XXX

## Introduction

The ball-end tether is suitable for use with the LP series with the Terminal Box termination option. One end is secured to the built-in fork and the other end is affixed to the face of the motor or flange. This part must be ordered separately

## Model

- M9230-04/XXX, where XXX = length in cm.

## Features

- This threaded rod tether has swiveling ball ends that compensate for movement due to shaft runout and axial motion while keeping the body of the encoder from rotating.
- The threaded rod and locknuts make this ball end tether somewhat adjustable in length, so it can be used in a wide range of applications.
- Maximum misalignments are as described below and shown in the illustration.

Perpendicularity	Axial Misalignment
3° on 60mm radius	+/-10° maximum either direction
15° on a 85mm radius	

Sensata Technologies, Inc. ("Sensata") data sheets are solely intended to assist designers ("Buyers") who are developing systems that incorporate Sensata products (also referred to herein as "components"). Buyer understands and agrees that Buyer remains responsible for using its independent analysis, evaluation and judgment in designing Buyer's systems and products. Sensata data sheets have been created using standard laboratory conditions and engineering practices. Sensata has not conducted any testing other than that specifically described in the published documentation for a particular data sheet. Sensata may make corrections, enhancements, improvements and other changes to its data sheets or components without notice.

Buyers are authorized to use Sensata data sheets with the Sensata component(s) identified in each particular data sheet.
